

# **BEYOND BORDERS & BOUNDARIES: Global Insight journeys**

# Upcoming destination: Morocco, May 20-22, 2025

"Beyond Borders & Boundaries" is a new initiative by the West Sweden Chamber of Commerce, launched in collaboration with Sweden's diplomatic missions and embassies abroad. The goal is to seek inspiration from new perspectives, different conditions and alternative ways of tackling challenges. Only through a broad range of insights can we become truly competitive.

We are starting this initiative together with the Swedish Embassy in Morocco and are offering a unique business trip focused on perspectives, insights, and business opportunities.

## Morocco and the program

How do other countries strengthen their business environment and create the right conditions for growth? How are key future challenges such as skills supply, AI, digitalization, and the green transition tackled? The goal with visiting Morocco is to gain insights, benchmarks, and inspirational ideas to bring home. The aim is to also see business opportunities and get input for strengthening collaboration between businesses and policymakers.

Morocco is often described as "a bridge between Europe and Africa", with only 14 km to Spain. This lower middle-income country has in recent years implemented major reforms and investments to strengthen economic development, diversify its economy, and become a more inclusive society. The main economic sectors are agriculture, industry, and services.

Morocco's geographical proximity to Europe and its ambition to remain competitive in the EU market push the country to align with European standards. As a result, an increasing number of companies are choosing Morocco as a production hub, and many international businesses have established regional offices there, among them several Swedish. As part of our visit, we are planning to visit four such companies: **Stena Line**, that in 2024 acquired 49 percent of one of the companies running the ferry route between Morocco and Spain; **SKF**, who invested in a new production facility.; **Volvo Trucks**, that operates in Morocco and delivered Africa's first heavy-duty electric truck in Morocco; **Trelleborg**, investing in new production facilities for the aerospace sector.

Moreover, Morocco will host the 2030 FIFA Men's World Cup along with Spain and Portugal, This has further accelerated investments in the region.

Examples of key areas where Swedish solutions are in demand:

- **Green Transition:** Morocco is at the forefront of sustainability efforts, with significant investments, a well-developed policy framework, and strong ambitions to phase out fossil fuels.
- **Healthcare/Life Science:** Morocco is undertaking one of the world's largest healthcare reforms, universalizing its social security system and upgrading as well as expanding the hospital infrastructure.
- **Digitalization:** Morocco has a complex bureaucracy, and both the public and private sectors are highly interested in digital transformation. Large investments are being made in digital infrastructure, 5G deployment, and various e-solutions.

## **Tentative program** (Monday 19th MAY – Arrival Rabat, Flight)

## TUESDAY 20th MAY - RABAT

### Introductory meeting & program

### **Ministry of Industry and Trade**

Business opportunities, how to move forward in the energy transition, investment/business climate.
